Mark – you may want to ask WDNR and DATCP if they have an existing MOA/MOU between the two agencies. I know they had one that was signed in 1980's, not sure if it is still effective or if it has been superseded by a more current MOA/MOU. If they have an existing agreement it may clarify any questions that EPA has on how the agriculture program is currently split between the two agencies. The 1980's MOU recognized that WDNR and DATCP administer programs under different statutes each of which has separate purposes and objectives yet the programs administered by WDNR and DATCP have a related goal, that related goal is to manage land and manure to maintain long-term productivity of Wisconsin farm industry and to maintain and improve water quality of the waters of the state.
